DETAILED ACTION

Allowable Subject Matter

Claims 25-67 are allowed.

The following is an examiner's statement of reasons for allowance: in the environment of illuminating a utility meter-viewing field for displaying the meter read-out. The closest prior art Hattori '350 discloses a method of illuminating a utility meter's viewing field. However, with respect to claims 1 and 61, Hattori fails to teach or suggest a supply meter system comprising, a camera, a frame in the form of a hollow shell, such that the shell extends around the viewing field; wherein the shell produces a predetermined spacing between the camera and the surface of the supply meter, the shell establishes an orientation of the optical system of the camera toward the viewing field, and the shell extends around the optical system, a light source is positioned above the viewing field by the shell and the shell extends around the light source; and a display connected to the camera for displaying the image of the viewing field. With respect to claims 62, 65, 66 and 67, a supply meter system comprising, a guide system on the supply meter, a light source positioned above the viewing field by the guide system for illuminating the viewing field, an electronic image reader positioned above the viewing field by the guide system for obtaining an image of the viewing field, a camera mounted to a support so that the camera is in a predetermined position above the display for recording data shown on the display.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

1. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure is Hattori '350, Lewis et al '331, Yoo et al '943, Shan et al '504, Marsh et al '253, Konicek et al '704, and Garcia et al '351. Cited prior art disclose the use of a camera to capture image of a utility meter. However, cited prior art fails to teach or suggest an illumination method of the present application.
